TASK FORCE WEB

Portal Services and Introduction to Advanced Topics

9 July 2002

Geary Sutterfield
TFW DC

Portal Services

- The Portal Services are:
  - Service Registry. We provide a web-based registry browser (current) and UDDI V2.0 API (future)
  - URL Rewrite. What is it and why is it important?
  - XML Transformation. Provides a common XML/XSL conversion service.
  - Web Service Execution Engine (WSEE). Connecting SOAP-based web services to the portal.
- The use of the Portal Services is optional.

Other Advanced Topics

- Web Services (SOAP, WSDL, UDDI)
- PRI Data
- Error Handling
- Portal CSS and Look-and-Feel Integration
- Security
- NMCI Integration
- IT-21 Integration
- Mobile Code Hosting
- Migration of Pilot Service Modules
